Languages

-  Italian Native speaker
-  English Proficient (C1)
-  French School level
-  Dutch Beginner-intermediate

Skills

- Programming: Python, C++
- Webdesign: html, CSS
- Office, $\text{\LaTeX}$, Git

Hobbies & projects

- 3D animation (Blender)
- Board games and card games
- Origami and paper craft

Personal profile

I am a very curious and inquisitive person who always enjoys exploring how things work and learning something new on the way. Through my studies and personal projects, I developed strong problem-solving and analytical skills, alongside solid technical abilities in data analysis and programming (Python and C++). I am eager to work for an organization that contributes positively to the world and society.

Education

- 2021 – 2025 **Master's in Physics and Astronomy** Radboud University
Specialization in Particle and Astrophysics
I leaned towards data science and the experimental parts of physics, making extensive use of Python and C++.
Master Thesis
My project was the analysis of pixel sensors for particle detection, ensuring per-hit efficiency above 95%. I developed my own code for data analysis and visualization. Grade: 8.
- 2015 – 2021 **Bachelor in Physics** Università degli Studi di Milano Bicocca
I always liked multidisciplinary, so I followed courses from very different fields of study like *Mathematical Finance*, and *Networks and Operative Systems*.
- 2009 – 2015 **Scientific High School** Liceo Scientifico Galileo Galilei
Science oriented High School with French as third language. During my 4th year I spent 5 months in New Zealand as exchange student, hosted by a local family.

Working Experience

- 2018 – now **Private teacher** cooperative "il-Cubo"
I have tutored more than ten High School and Bachelor students on various scientific subjects (e.g. Maths, Physics, Chemistry and Quantum Mechanics).
- 27 May – 3 June 2023 **Control room shifts** CERN
As part of my Master's thesis, I participated in the control room shifts for the Test Beam data taking at CERN for the High Granularity Timing Detector (ATLAS). I actively looked after the operations, adjust setups and manage logbooks.
- May – July 2021 **Internship** IMS Giotto
Internship at a company specialized in mammography and digital breast tomosynthesis. I gathered and digitized data from quality tests and I performed a preliminary analysis.
